---

1. Problem Statement: Write a program that will take three integers as input and print their sum as output.

Sample I/O:

Sample Input	Sample Output
1 2 3	6
5 4 2	11

2. Problem Statement: Write a program that will read two characters from the user and print them in the console.

Sample I/O:

Sample Input	Sample Output
a b	ab
c d	cd

3. Problem Statement: Write a program that will read a string from the user and print the exact same string in the console. *String may contain spaces.*

Sample I/O:

Sample Input	Sample Output
Hello World	Hello World
Bangladesh	Bangladesh

4. Problem Statement: Write a program that will read two strings from the user and if both of the string are same, print "**Duplicate**", otherwise print "**Different**"

Sample I/O:

Sample Input	Sample Output
Dhaka Dhaka	Duplicate
ABCD ABD	Different
