Problem Statement: Write a C program to identify whether a given line is a comment or not.

AIM: Identify whether the statement is comment or not.

ALGORITHM / PROCEDURE:

Read the input string.
Check whether the string is starting with '/' and check next character is '/' or'*'. If condition satisfies print comment.
Else not a comment.

[Viva Questions]

1. What is Comment?
2. How to identify comment?
3. What is single line comment?
4. What is multiline comment?

Exercise: 1

 1. Write a C program to recognize '/' in inside the program.
